

METRO HEALTH HOSPITAL

Department of Endocrinology -- Discharge Summary

PATIENT INFORMATION

Patient ID: PT-88201 MRN: MH-20260218-001
Patient Name: Maria Gonzalez DOB: 1975-11-22
Admission Date: 2026-02-15 Discharge Date: 2026-02-18
Attending Physician: Dr. Sarah Jenkins, MD -- Endocrinology

PRINCIPAL DIAGNOSIS

Type 2 Diabetes Mellitus with Poor Glycemic Control (ICD-10: E11.65)

HOSPITAL COURSE

Patient presented to the ED on 02/15 with altered mental status, severe dehydration, and serum glucose of 485 mg/dL. She was admitted for IV fluid resuscitation and insulin drip protocol. Transitioned to SubQ insulin on day 2.

DISCHARGE LABORATORY RESULTS

Serum Glucose (fasting): 210 mg/dL [Reference: 70-100 mg/dL] HIGH
Hemoglobin A1c: 9.4% [Reference: < 5.7%] HIGH
Serum Creatinine: 1.1 mg/dL [Reference: 0.6-1.2 mg/dL] Normal

DISCHARGE RECOMMENDATIONS

1. Titrate basal insulin (Lantus) to 30 units nightly.
2. Refer to certified diabetes educator within 2 weeks.
3. Follow-up with Dr. Jenkins in 1 week.
4. Recheck HbA1c in 3 months -- target < 8.0%.
